Freedom has become a labor camp. Cameras, cyber surveillance, and clandestine security contain truth as free-citizens engineer systems that restrict children inside the boundaries of a police state. Set in 2042, society's day-wardens are fighting those who manage the corporation at night while super-wardens struggle amid government expansion.

Prisoner Noodle Church didn't mind working in Freedom Incorporated but refuses to call it *freedom*. That's a big mistake! Refusal to ignore truth lands Noodle inside Freedom Incorporated's medium-security ward where day-shift wardens pressure him to talk about wardens working at night. Yet, when Noodle exercises his right to remain silent because living in Freedom is easier that way, super-wardens demanding his experience living in covert society take the hero for interrogation.

A beacon of freedom in day/night wardens' bi-polar war for power, protecting sources of his inspiration gets Noodle moved to high-security but before being locked in super-maximum security wardens offer Noodle a deal; he can return to work in the low-security ward of Freedom Incorporated if he pleads insanity then testifies clandestine security caught following him were a figment of his imagination. Noodle refuses.

Night-shift wardens try murdering him, day-shift wardens place Noodle in solitary confinement. From there he's writing to you, prisoners of Freedom Incorporated, asking for the freedom to lead this corporation without bombs, bullets, powders, or policemen.

1st. edition eBook-cover

Freedom Incorporated's first edition cover is a double-entendre. Entities incorporated Inc. get created to contain all subsidiaries. In this novel one massive low-security prison has incorporated local, state, judicial, congressional, and executive government as well as their political parties. It's incorporated private companies through nationalization, partnerships, and/or regulation but functions behind veiled security. As a whole society now needs to turn a profit in order to pay off its debts. In business that's normal, but in *Freedom Incorporated* management operates covertly.
